

Max for VD!

Hi, I'm Max, and I'm a 22 year old Transport Planner hoping to be the next Vice Director!

What are my Ideas?

- To get the involved with the Leeds Climate Action Group so we put our combined knowledge behind influential changes.
- Organise a lot of social events to help get people involved with the society and so that people can make connections.

What will I bring?

- A passion for the society and willingness to help others whenever needed.
- Organisational and management skills.
- Experience with community projects.
- Good music!

I hope that through my academic background, both as studying transport planning and having studied civil engineering, I will be able to provide a set of knowledge and a different perspective that could bring more strength to our team.

I want this society to be a **fun and collaborative** place for us to come up with creative ideas to **improve the city around us**, and help us gain good experience for after we leave!

I hope you take the time to read my statement! :)
