

Surgical Specialty Event Plan

Surgical Hackathon

- Teams of students headed by doctors collaborate to focus on solutions to challenges faced by the different specialities (3-6 groups)
- Prize for the winning idea! (A fun way to learn about the different specialties along the way)

Surgical Speed-Dating

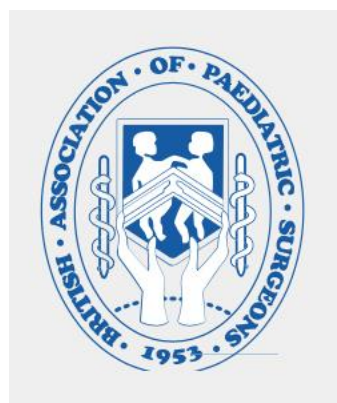

- Series of small-group rotations where students spend 10-15 mins with surgeons from various specialties
- Chance to ask a range of questions and get more direct answers instead of general teaching

MMI Style Simulation Workshop

- Multiple stations managed by a surgeon of that respective field to guide participants through the simulated tasks
- Hands-on practise at the key things tailored to each specialty

Present the three options as a Poll on the Cutting Edge Instagram page to see which event the members most want!

Once the votes are in liaise with the cutting edge team to fully plan and prepare the event

Contact the relevant surgeons using the society's past connections as well as new contacts from the RCSE 24 professional associations with the plan and arrange a convenient date and time
