

# TOBY BUXTON

I'm Toby and currently in my second year studying medicine. The skills used in my degree include having a logical mind and utilising mathematical skills, making me a good candidate for the role of treasurer. Before coming to Leeds, I rowed for my local boat club whilst also being a junior rep on the committee. I am also an active committee member for MedSoc, giving me experience in committee roles both inside and outside of university.

As treasurer, I would build upon Alfred's successful work by maintaining effective policies, as well as introducing new one to allow the boat club to prosper financially.

My aims are:

- To continue with the seat fee cap as it enables equal opportunities to all members of the boat club by making racing more accessible
- Managing finances in a transparent and honest way. I will strive to make a clear record of all transactions, ensuring trust is maintained with all members of the club
- To work with the alumni and fundraising secretary to increase the potential of funding pathways. I also hope to work with the kit secretary to ensure kit is accessible to all and to sell previous years kit stock which has yet to be bought
- To be a part of senior three where I would like to meet the standards of previous years and offer my support. I will be committed to monitoring the clubs finances and amplify the inclusivity and accessibility of the boat club, further improving the variety of funding routes
