

Mila for Radio Astronomy Officer

About me:

Name: Mila

Age: 21

Studies: Computer Science (currently
doing a year in industry in Leeds)

TLDR: Why I am applying for the role of Radio Astronomy Officer

I have relevant experience working with technical equipment and being part of a team. I enjoy being hands-on and tinkering with things as well as making things from scratch. I've dabbled with electronics and am keen to jump straight into a big project. I also love astronomy and would find it very cool to observe the universe, regardless of how many clouds are in the sky!
