

RADE ALAO

S E C R E T A R Y

Hey! My name is Rade Alao, I am a second year International Relations student. I am running for the secretary position in the Black Fem Society. I enjoy going to art galleries, drawing, and listening to music. I am particularly drawn to media platforms which represents people like me in our multifaceted nature. I come from a big family, and I am the one who manages and keeps everyone organised on holidays and large family events. As a result of this I have come to enjoy planning and organising while developing the skills I need to do it. I've learned how to deal with different groups of people with varying personalities

My experience with my family has allowed me to develop my time management, effective communication, and problem-solving skills. Developing these transferable skills has provided me with the experience and knowledge required for this role while also creating a foundation for me to build upon and learn new things.

As secretary:

- I would advocate for the society to hold more events during the day so that people who can't attend night-time events to be included.
- Create more opportunities to bond and create friendships within the society
- Maintain and develop the communication within the society

Coming to uni I realised the need for community and safe spaces such as the one Black Fem Society creates for people like me. I would give back to the society and contribute to the community we share.
