

Hello, my name is **Kertu**.

I am a first-year medical student and I would love to be the Pre-Clinical Rep for PERKS.

Why? Well, I will keep it short and list some reasons (I do love lists):

- I am very interested in pathology. For Christmas I received new slides for my microscope.
- My love for pathology would help me promote PERKS because I would never run out of reasons why it is the best society out there.
- I am curious and eager to learn. I like to ask 'Why?' and 'How?' a lot.
- I also like to find answers to the questions others might shrug off.
- Being a mature student (and a mother), I believe I have some experience and eye for noticing when a diverse approach is required.
- I am responsible and honest. I believe that being transparent is very important in communication.
- I would love to gain more experience and contribute what I can to PERKS.
