

Vote Thea for welfare!

but
why?

I think one of the best parts about being in UML is the people you meet, and I would be so excited to support everyone here - I want to help make UML an even happier and closer community.

If you vote me for welfare, I guarantee a safe, discreet and open space for expressing issues both within the society as a whole and individually.

I have a real passion for helping people and understanding them, so I can promise that I will provide great support for everyone next year.
