

# bank on sam

## i'll treasure your vote

why i'd be an unreal treasurer:

- she's a maths queenie, do i hear an A in a-level maths?
- i'm very friendly and cannot wait to welcome all of the freshers and make them feel a part of the exposé family
- exposé is my life and i'm not ashamed to say i'd put it before my degree
- not to bang my own drum but i'd say i'm quite an all rounder and happy to choreograph in pretty much any style for auditions, luu comp and any fundraisers
- i have friends in other dance societies that are also running for comittee #connections that would love to do collabs so we can start repairing our relationship with the other societies and all be besties!!!!

i just love exposé with my whole entire heart and would be honoured in having a hand in why the next year of freshers will (hopefully) love it as much as i do!!!!

ideas i have for next year:

- more fundraisers!!! more money = better costumes and we all want to look sexy as fuck in the show so why don't we werk for it
- more collabs!!!! i'm a people pleaser and i just can't have people not like me so i think we should work really hard on becoming friends with the other societies and also collabs are just really fun and push us all out of our comfort zones trying new styles and thats how we learn and grow as dancers!!!!!!
- i could code a program that links to an sql relational database so instead of using boring spreadsheets (yawn) i can input the data and it will save to the database in tables that are all linked so there can be a main table with everyone's personal details like date of birth and allergies etc and then it would link via keys to a table for each payment that i can tick off when people pay and then i could even extend it to include who's in each dance and who's doing comp and costumes and stuff so all of the committee could use it so then everything's all in one place and its easy to find
