

Charlotte Webb for President of the Sustainability Society of the Faculty of Environment.

Why me for president?

I have been an active committee member since Sussoc's launch in 2022—most recently as the secretary of the society. I have developed key contacts with both SOEE and LUU allowing me to take the society to the next level.

I'll run the society based on the views of the members to ensure you get the ultimate society experience—including the launch of fortnightly socials. And workshops.

Any suggestions on how to further improve the society will be taken on board. I'll keep the £5 membership fee to ensure it remains accessible to most members of the university community.

Past Experience:

I have vast levels of leadership experience stemming from my role as a residence life assistant. This involved planning events for students across halls and helping aid the further development of the student experience.

Socials:

I plan to run crafting sessions similar to this year such as tote bag decorating, but also run Christmas themed workshops, a sustainability summer ball and collaborations with other societies. I also plan on carrying on the running of the boys football team and introducing a girls school team.

Any Questions? Email me on Ee21cw@leeds.ac.uk
