

DANIEL WOOD FOR YOUR PRESIDENT

A bit about me:

Hi I'm Dan! I'm in first year studying Biology, Biochemistry and Environmental science. I'm from Manchester and thought I'd keep it Northern by coming to Leeds. I think we can all agree that Leeds is the best Uni out there ;) Outside of Uni, I am a keen runner and love cooking!

Some ideas for the Society:

- more themed nights
- work with other STEM societies so everyone can get to know people in their lectures that aren't on their course.

Why I'd like to be President:

NatSci Society was so welcoming to me at the start of the year and I'd love to be a part of it next year to make sure it can continue to do that for all the new first years next year so they can feel the same way. The fortnightly socials have given me a welcome outlet from the academic side of uni and have given me an opportunity to get to know everyone on my course, some of which I would never have met because of our crazy timetables!

**VOTE DAN!
TOGETHER WE CAN!**

Why I'd be good as your president:

- love being part of a team and helping everyone achieve their goals
- ran a committee before when I was Head Boy
- been the point of contact for external businesses before when fundraising for events, such as an end of year ball
- have experience organising large groups of people as a run leader at my run club
- extremely organised - there's a reason I plan the holidays with my friends!

Most importantly, I have been to nearly all of the socials this year and understand how this society works well and can give everyone a chance to relax and have FUN!

**DAN WOOD: YOU
KNOW YOU SHOULD!**
