

RIYA FOR SECRETARY

ABOUT ME

Hi everyone! I'm Riya, currently in 3rd year. I've been interested in paediatrics since the start of medical school, and would love to explore more of what it's about. Paediatrics excites me as I've lots experience working with children, and I believe it's an incredibly warm and welcoming specialty with a lot of scope for development as a doctor.

WHY ME

I have experience being on a society committee after being member's co-ordinatory for Teddy Bear Hospital this year, as well as EDI rep for Medsoc, and treasurer for Heelz dance society, giving me experience in managing different types of responsibilities, and collaborating with different teams. I have also volunteered for two year with Teddy Bear Hospital as well as volunteering in a Children's hospital, giving me prior experience in working with children. If I was to be on committee I would be a focused member, dedicated to getting involved in events and new ways the society could get exposure.
