Why Should I Be Social Sec?

- I have massively enjoyed being involved in the society's social events during my first two years of uni and would love to give back by helping to run more of them next year
- I have lots of transferrable experience from planning and running a multitude of different events myself from charity quizzes to pub crawls
- I understand group settings and excel in them so will be able to work with our other committee members to run our social events and other society activities
- I will put as much effort as possible into the role and while I can't guarantee that socials will run quite as smoothly without Dan at the helm, I will be able to keep them well within our own standards
- I may not be a graphic design wizard but I can also aid our new media manager position with creating announcements, promotional material and running the social media pages.

*Please refer to my candidate statement for more coherent reasoning to why I should be social secretary
