

RISHABH SUVARNA

MEDICAL STUDENT

WHO AM I?

Hi everyone,

My name's Rishabh! I'm originally from India but I have been brought up in Malaysia. My interests range from: cycling, programming, cooking and piano playing. As someone who has found PALS to be immensely useful in my revision, I'd love to be your PALS Year 1 Co-Lead.

I understand how challenging and frightening the transition can be from high school to University, especially Medical school. With that, I'd like to give back to the community by helping to create concise revision sessions in a creative and simple manner that optimizes your learning! I hope to share my experience/tips for learning medical school content to help everyone enjoy their first year at Leeds!

WHY ME?

Past Leadership and Society Experience: As an environmental prefect and the head of a charity at my high school, I helped raise funds and awareness for numerous environmental and social causes during COVID. As BrainLeeds Y1 Rep and NANSIG Leeds Rep, I've worked with a huge group of people to bring useful insight and experience into Neurology to our uni!

Teaching Experience: 2 years of experience as a private tutor for IB Maths, Chemistry, Biology, Physics Higher Level along with 4 years experience in tutoring IGCSE French, Maths and the Sciences. Always aiming to personalize sessions for my students, listening to feedback and making sessions interactive by using technology effectively.

With the following skill set, I strongly believe that I have the necessary skills and capabilities to support future medical students in this learning scheme!
